

VEHICLE PREPARATION AREAS

- **SINGLE OR DOUBLE UNITS**
- **CROSS DRAFT OR DOWNDRAFT**
- **TWO STAGE FILTRATION**

Garmat® USA provides vehicle preparation areas to meet your shops' requirements. Preparation areas are designed for the removal of dust from the work area. They are capable of exhausting filtered air to the outside, or recycle the filtered air back into the shop environment. Local Fire Marshals do not permit the use of the preparation areas for spraying or priming.

VEHICLE PREPARATION AREAS

Garmat® USA Vehicle Preparation areas are constructed of e.g. steel with durable powder coated finish on facia, and ceiling panels. All units are equipped with one reverse incline fan, 5 HP motors/ single units and 10 HP motors/double units, 3 phase. Complete electrical controls are provided (including motor starter, on-off switch and pneumatic controls for recycle damper). Two stages of filtration are provided. Efficient air flow of 9,000 CFM/single units and 14,000 CFM/double units. Refer to feature table for a configuration that is appropriate for your requirements.

Note:

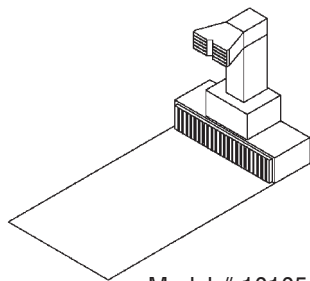

10100 Series = Single Units

10200 Series = Double Units

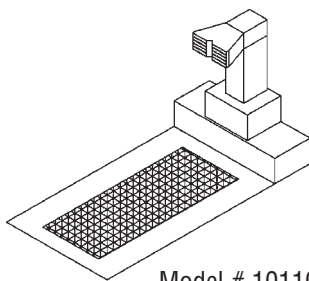

MODELS
